Skills measured

This 70-461 exam measures your skill to achieve the technical tasks the following. The percentages indicate the relative weight of each and every major topic area on the exam. The larger the percentage, greater questions it's likely you'll see on that content area for the exam. View instructional videos concerning the variety of question types on Microsoft exams.

Please note that the questions may test, and often will 't be limited to, the themes described within the bulleted text.

Are there feedback about the relevance with the skills measured about this exam? Please send Microsoft your comments. All feedback will be reviewed and incorporated as appropriate while still maintaining the validity and robustness of the certification process. Be aware that Microsoft will not likely respond right to your feedback. We appreciate your input in ensuring the quality of the Microsoft 70-461 Certification program.

For those who have concerns about specific questions on this exam, please submit an examination challenge.

If you have other questions or feedback about Microsoft Certification exams or concerning the certification program, registration, or promotions, please speak to your Regional Service Center.

In December 2015, this exam was evaluated for applicability to both SQL Server 2012 and SQL Server 2014. It was determined that no updates to exam objectives were required.

- ? Create database objects (20-25%)
- ? Work with data (25-30%)
- ? Modify data (20-25%)
- ? Troubleshoot and optimize (25-30%)
