

the owner of the family took the satsuma to shave off the hair, the next day to see some heartache

Keeping kittens or pets, there will inevitably be a problem, that is, they are more serious hair loss, and there is no silicone prototyping good way to deal with it, only according to the cleaning and hygiene over and over again to solve.

A friend of the veterinarian Xiaoliang is also, just a short-haired pug just, home hair fall to make people can not bear. Discuss the following small story shared by a netizen.

The netizen has a Samoyed at home, and its snow-white hair looks very beautiful, but also very deadly. Once the season of hair loss, the home is like snow, full of hair flying around the house, clothes, tables, sticky everywhere is hair, people painful.

In order to have a tidy home, the netizen thought of an idea, after all, the temperature is also warm, help the dog shave off the hair is not the end of the matter? So they took the satsuma to shave off the hair, but when they went back the next day and saw that there was something wrong with it, they felt guilty for a moment: was it also autistic?

Just see the dog depressed leaning against the door to sit down, the vision looks to have some stagnant, see the pooper scooper air purifier for pet hair to la, also not like the usual that jump up and down, just stifled a look at the master family. After seeing the dog this way, the owner's family heartbroken, vowed not to give it that shave from now on!

Hey, veterinarian Xiaoliang feel, Satsuma that body snow white hair but it is proud of ah, now the body is bare, nothing, not sad is strange!

The owner's behavior really is not to be denied, there is no consideration of the dog's inner feelings ah. Like the very daily life of these children to do for the determination of the mother and father, the name said that the purpose is for their own good, and then forced the child to do something unwilling to do, almost did not ask the child is really like!

The fact is that children nowadays are already under a lot of pressure to do their work, and they can't finish their courses, they can't finish their lessons, they have already undertaken too much! If mothers and fathers force them to do something else, it is easier to cause children to collapse. Now children's mental capacity are weaker, it is proposed that adults should usually pay more attention to the psychological and nutritional health of children, and do more communication.

The veterinarian Xiaoliang Kepu: spring is the peak of the animal estrus period, if you do not want to let the family pet pregnant with the idea of having children, in consideration of the pros and cons of the premise, you handheld vacuum cleaner suppliers can take them to do spay and neuter surgery. However, there are some drawbacks to spaying and neutering surgery, and cat slaves need to pay attention to them.

In addition, the spring small pets hair loss is also more serious, can moderately cut their hair, but do not shave, or not only easy to make small pets feel seven skin diseases, and will make their physical and mental health is affected, many small pets will be due to the absence of hair and got depression Oh.
