

Global Shipping and Logistics Company

Dubai, the Middle East's fastest growing tourist destination is also a hub for a growing [global shipping and logistics company](#). Dubai's status as a leading financial and cultural center has helped attract companies from across the world to the country in search of new markets and opportunities.

As a result of the recent economic growth in the UAE, international freight forwarding services have seen their growth and profits increase dramatically. Dubai and the UAE are now recognized as one of the leading locations for international shipping, as well as logistics, in the Middle East. International cargo forwarding has now become an integral part of a Dubai business.

Logistics is the core function of a logistics company and this is where Dubai excels. It offers a complete range of services including container transfer, air transport, land transport, road transport, and marine transport. In addition, Dubai now serves as the headquarters of several international logistics companies.

A shipping and logistics company established in Dubai will be able to offer a wide range of services to both local and international clients. Local services include air freight, land transportation, water transport, container transfer, and freight forwarding. These services will include services for the provision of temporary and permanent storage of goods. In addition to these, shipping and logistics companies in Dubai also provide insurance coverage for goods that are shipped. These services are available in both domestic and international destinations. International freight services include container and air freight. For air freight, these services include air cargo brokerage, flight management, aircraft maintenance, and air cargo clearance. Cargo clearance includes inspecting the cargo for any hidden hazards, such as explosives, before it is transported to its final destination. In addition, air cargo brokerage includes handling, loading, and unloading of luggage, freight, and parcels. This helps the companies to ensure that they do not ship goods which might not be fit for transport on land or in air.

A shipping and logistics company established in Dubai will also offer services such as warehousing and distribution. The company will also handle goods for export and import of a variety of products. These include vehicles, containers, cargoes, products, equipment, machinery, and raw materials. The company also deals with customs clearance for imported goods and ensures that there is no cross-docking of goods that requires local taxes.

As per the latest statistics, the number of exporters in Dubai is increasing and many exporters have shifted their businesses from other countries to Dubai. Some of these exporters may also

have a presence in other countries. This means that there are more exporters, but fewer retailers and importers in the city of Dubai.

The growth rate of exporters in Dubai is still slow compared to exporters in other countries. However, the number of exporters in Dubai has been increasing since 2020. This is because of the availability of cheap land, a favorable tax regime, access to skilled manpower and technology, and international airports. International freight services in Dubai have increased in recent years.
