

Special Needs Children Treatment

One of the main reasons for a child to become Special needs is brain injury before, during or after birth. special needs children could have surgical complications, an illness, reaction to the medication, or an adult illness that injures the brain.

We at IIAHP Therapy Center provide the best therapies for special needs children of age group 2 to 17 years old and all the special needs children are improving with our therapies.

👉 Home programs are also available for distant/foreign parents.
