

## Show Off Your Beautiful Smile With Semi Permanent Makeup - SPMU World

Lip tattoos may conjure up images of a fancy grande dame with permanent lip liner who never seems to fill in lips, but the technique has been refined to its current form. Lip tattoos, also known as lip blushing or lip tinting, are a simple wash of sheer color across the entire lip. This super-natural, [semi permanent makeup](#) tattoo defines your shape and builds consistent color for fuller lips without filler and a more polished pout.

SPMU World is the best place to go for high-quality microblading tools and materials. If you're looking for everything you need to get started with semi permanent makeup, look no further than our extensive product line. Because we stock everything from blades and inks to needles and tweezers, you can be certain that you're getting the best tools for your needs.
