

[Calacatta Quartz Kitchen with a Perfect Finish](#)

Bianco Calacatta Kitchen Specifications

Core material: Calacatta Quartz

Nature: Engineered Stone

Colour: White

Pattern: Distribution of Calacatta light grey veins

Bianco Calacatta quartz is a stunning shiny white worktop with distinctive light grey veins that run on a white background giving it the appearance of marble stone. It is in fact inspired by the world-famous Calacatta marble. The dense electrifying veins on top of a soft greyish luminescent backdrop evoke contrast and personality that pervades any space you enter. This beauty adds a dramatic touch to both classic or contemporary style that you wish to attain for

your homes. It will do so by easily blending into a wide range of kitchens and bathrooms, offering the perfect combination of modern style and long-lasting intensity.

Calacatta White Kitchen, a Tough Competitor with Marble Amongst Homeowners

Marble vs. quartz has been a popular subject, with the latter's functionalities and aesthetics becoming more popular as technology improves. We've got plenty of reasons why you should consider quartz worktops and let marble take some break. Bianco Calacatta imitates classic marble very precisely and it does so at a much affordable price than a marble. Bianco Calacatta Quartz countertops are more durable, easier to maintain, and do not require any coatings or sealants unlike a marble worktop, making it a more practical choice. This white quartz worktop is composed of 90% natural quartz, assuring long-lasting surfaces. Bianco Calacatta complements white, black, cream, and grey, and it is suitable for both modern and traditional kitchen styles. This Classic Calacatta quartz worktop provides consistency at its finest, capable of providing 100 percent waterproof surfaces in your bathroom. It can make a countertop you can rely on at all times in your kitchen. It has a nonporous counter surface unlike marble and thus ensures optimal hygiene for your kitchen premises.

Bianco Calacatta comes in a number of sizes suitable for floors, tiles, and other applications. It is available in both Polished and Matte finishes. The polished finish provides a lustrous surface that is very resistant to stains and scratches, complementing the majority of design ideas. The matte finish can be selected for industrial-styled kitchens to mimic the look of natural concrete, or in traditional-style kitchens to add a natural stone feel. Our customers are guaranteed to get the perfect worktops for any kitchen design they have in mind. Quartz worktops made of Calacatta quartz kitchen are a fabulous option for lavish kitchen renovations and bathroom remodels, especially those with large descending counters, and whole length backsplashes (both kitchen backsplash and bathroom backsplash), marble-effect-work-surface-and-upstands and kitchen islands. This stunning material is also ideal for fireplaces, bathroom shower walls, breakfast bars, wall coverings, and other living areas in the house.

What Thickness is Ideal Calacatta Stones?

Thicknesses of worktops you choose to purchase depend upon different kitchen styles and the purpose of your application. Slab thicknesses that are commonly available whether you are looking for worktops online or within your local market are 20mm, and 30mm. However, quartz worktops can be available in other ranges of thicknesses too upon customization.

Sizes for Calacatta Stones for Kitchen

The standard slab size of 3040mm x 1380mm are offered in Bianco Calacatta. It is also available in Jumbo size, measuring 3200mm x 1600mm. This is great for horizontal surfaces such as kitchen splashbacks, bathroom facades, and wall cladding.
