

How to choose the best smartwatch: 5 steps to a good purchase!

[Smartwatches](#) are a must-have these days. But buying the one can be really difficult, especially given the number of options available in the market.

You can use the below mentioned quick guidebook to buy a smartwatch:

Compatibility

What's the point of having a [smart watch](#) if you cannot connect it with your smartphone?

Hence, it is important to check whether your smartwatch is compatible with your mobile phone.

For example, if you have an iPhone then getting a watch that only works with android make no sense. Hence, check for compatibility between both devices before making a decision.

Build & Quality

You plan on wearing your watch every day. It should be able to tolerate everyday wear and tear and accompany you on all your adventures. Check the build material and how much it weighs. You can look for gorilla glass glasses that are scratch-resistant. Also, do not forget to have a look at the IP rating of the watch. This tells you if your watch can handle some dust or splashes of water.

Health & Fitness Related Features

One of the major advantages of getting a smartwatch is the fact that they help with monitoring and tracking many important health indicators. From monitoring your heart rate 24X7 to analysing your sleep patterns, different smartwatches support different features that help you live a healthy life.

The stress monitor is a useful feature in current times where we live a hectic life. The various sports modes help track your daily workout and give you data that will help you make the most of it. There are many [smartwatches for women](#) that come with a feature that helps women track their menstrual cycle as well.

You can even set up reminders to drink water and move around. This ensures that you are properly hydrated and do not live a sedentary lifestyle.

Smart features

Another reason for buying a [fitness smartwatch](#) is that it does more than just telling you date and time. You should look out for a smartwatch that supports features that make your life

easier and productive. It helps you stay connected to the outside world by bringing in all the notifications from social media to your watch.

You can also count on your smartwatch to keep you informed about incoming calls even when your phone is not in front of you. There are some smartwatches that allow you to take or make calls from your watch, thanks to the in-built mic and speaker. Additionally, you can also control your music and camera from your watch.

Battery

What's the point of having a smartwatch if it's always discharged or always plugged in for charging? Hence, it is important that you have a look at the number of days your smartwatch can run for when fully charged. Additionally, do not forget to have a look at the amount of time it takes to get charged.

Price

Last but not the least in any regard, smartwatch price plays a huge role in making a buying decision. If you think that a [best smartwatch](#) has to be expensive then you are mistaken. You should first decide upon which features do you want and then decide upon the watch. Price should not be the only factor.

Now that you have some idea about how to go about buying a smartwatch, allow us to introduce you to some of the best smartwatches that you can have a look at:
