product inside the box. Similarly, you can add different box styles to make it more eye-catching. These boxes can be in top tuck, reverse tuck forward tuck, etc. To make it more luxurious we have an exclusive range of **sleeve packaging**. Moreover, as you are using it for marketing you can make it as a **display box** by adding a window die cut. In window die cut there are two options with PVC and without PVC. This window dies cut to make your product attractive so that the customer craves to have your product.

ICustomBoxes Use Best Material For Pre Rolls Packaging

In the manufacture of any product, the material is an important component. Material is the backbone of any product. ICustomBoxes also believe that material is something that can make you stand in the market. For your **pre roll packaging** we have the best range of material. We offer cardboard, kraft as well as cardboard. The most commonly used material for [pre roll](#)

[packaging](#) is cardboard; Because of its stability and durability. It is totally weather resistant and a good source during the shipping of your product. The external stress or force does not affect your product because it is strong enough to overcome it. As global warming is the biggest issue nowadays so to control it we play our role by presenting totally eco-friendly material. Icustomboxes material is disposable and reusable.
