

Impact of Coronavirus (COVID-19) Pandemic on Breathalyzers Market

The global [breathalyzers market](#) is estimated to account for US\$ 6,384.5 Mn in terms of value in 2020 and is expected to reach US\$ 71,866.2 Mn by the end of 2027.

Based on technology, the market share of fuel cell testers will grow as the need for smaller, longer-lasting, higher-accuracy, and lower-power devices grows. Fuel cell technology is primarily used to assess blood alcohol concentration and does not require many sensors. These gadgets are becoming increasingly popular since they can be used as both personal

and professional alcohol testing. Several manufacturers are expanding their efforts to develop novel technologies and better features, which will help the category flourish.

With the advent of strict government rules relating to driving under the influence, the adoption of breathalysers in alcohol detection applications will skyrocket (DUI). The medical application area, on the other hand, is growing rapidly.
