

# Embedded Software Development Services | Embedded Software Solutions | Sasken

Embedded Software Engineering is the process of controlling various devices and machines that are different from traditional computers, using software engineering. Integrating software engineering with non-computer devices leads to the formation of embedded systems. Sasken has 20+ years of deep domain expertise in the area of embedded software development & system. We offer middleware and protocol services to global tier-1 customers. for more details visit:- <https://www.sasken.com/industries/enterprise-devices/embedded-software-development>
