

# Feed to Food safety- Mycotoxin management

Feed to Food safety is one of the core focus areas for us at Trouw Nutrition. [#mycotoxins](#) pose a major threat because of their ability to enter the food chain via meat, milk and eggs while also impacting the production. Toxo MX and Toxo XL, our range of mycotoxin management solutions, can help to effectively mitigate this risk.

Want to know more, connect with us at: <https://www.trouwnutritionasiapacific.com/en-in/contact-us/>
