

# The Ultimate Guide to Buy or Sell Used Laptops Online

The popularity of [buying used laptops](#) is increasing day by day and a lot of people have very little knowledge on buying used laptops. Let's go and find out how we can be pro in buying laptops online.

Buying a **used laptop** is not a big deal anyone can buy laptops online by simply searching on Google used laptops for sale and you can browse hundreds of sites but the most important thing is how to buy laptops online without getting cheated.

We can also **sell used laptops online** and fix a reasonable price for the laptop to be sold online and if anybody interested in buying can contact you and pay you the price and take away the laptop but how to fix the price of the laptop to be sold online.

## What are used laptops?

[Used laptops](#) are not new laptops they are pre-owned laptops used by someone for some period of time and after getting used for a certain period of time the laptop is sold by the owner at a low and reasonable price and also in good condition.

Mostly used laptops don't have a warranty. So, if you are buying a **used laptop online** then you have to check and look at various things before buying the used product. In case of any

damages or faulty, you have to pay from your pocket to repair the used laptop as it doesn't have a warranty. So, be very careful.

If you want to buy a second-hand laptop just search on the internet for **used laptops for sale** you can find a lot of classified websites with plenty of options for used goods.

## What should I check before buying a used laptop?

1. Requirement- First thing is which type of used laptop you want to buy, what should be its minimum requirements that are your used laptop should have like RAM, processor, HDD, etc.
2. Laptop Body- Inspect the body of the used laptop to look for any sort of damages, scratches, and dents, etc. Also, check for missing screws and loose hinges, and the lid of the laptop.
3. Screen- Check the screen condition of the used laptops it must not be cracked or any sort of scratches on the screen. Turn on the full brightness of the screen and check the screen must not be dummy or dark.
4. Keyboard and Mouse pad- Check all key of the keyboard is working fine and check the keys are not broken or missing and also check the mouse pad of the laptop whether it is working or not.
5. Ports and Drives- Check all ports are working fine by connecting a pen drive or hard drive and also check the CD/DVD drive of the laptop.
6. Wireless connectivity- Check wireless connectivity of the used laptop by connecting it to a WIFI and also check Bluetooth connectivity of the laptop.
7. Speaker- Check the speaker of the laptop by playing some songs in low, medium, and high volume. The sound must be clear if not the speaker is damaged.
8. Battery- Charge the battery and check the battery drainage timing and also check is it charging properly or not.
9. Software- Check all the pre-loaded software like windows 10 or windows 7 is genuine or not. If there is pre-loaded anti-virus software, check the validity of the anti-virus.
10. Price and Quality- Check you are getting your used laptops at a very good deal and make sure the second-hand laptop you bought is worth the price you paid for it. The quality of the product must be satisfactory.

## What to do after buying a used laptop?

After buying a used laptops check the following things:

- Factory reset the laptop, as it is used by someone else. Factory resetting the laptop makes the laptop clean and experience like a new laptop.

- Check the windows version if it is an old version then update it to the latest version for the latest security patch for a smooth and safe experience.
- Install windows update as well as other hardware updates to the latest version so that it will work perfectly.
- If the laptop is slow then try upgrading it by adding some extra RAMs or Graphics Card so that it will run fast and efficiently.
- Try to keep the laptop clean and make sure you properly shut down the laptop. Directly pressing the power button may damage the motherboard.

## How to sell a used laptop?

We can **sell used laptop online** by posting advertisements on classified sites like **Cifyah**, Olx, Quikr and submit proper details and specifications of the laptops to be sold with a proper photo of the laptop viewing different angles and don't forget to mention your phone number. Anyone interested in buying your laptop can directly contact you either by mail or by call and fix a good deal and sell your laptop according to the price set by you easily and safely.

## How to fix the price of the used laptop to be sold online?

The price of the used laptop depends on which processor it has whether it has an i3 processor, i5 processor, i7 processor, rates vary from each processor.

There are other factors to determine the price of the laptop like how good is the condition of the laptop, how long it has been used, how much RAM and HDD inside the laptop.

The average price of Second-hand laptops excluding RAM and HDD:

- Processor i3 – Average cost around 20k-30k
