

Explore the Different Types of Trailer Brake Systems & Pick the Right One

Types of Trailer Brake Systems

Electric Trailer Brakes

Hydraulic Surge Brakes

Electric-Over-Hydraulic (EOH) Brakes

Whether you're hauling heavy loads or just bringing a utility trailer down the road, knowing your brake system matters. This guide breaks down the various options—like electric, surge (hydraulic), and electric-over-hydraulic systems—and shows what each is best for.

- Learn about **electric brakes**, how they respond to your tow vehicle's controller.
- Understand **surge or hydraulic systems**, and how momentum or fluid pressure triggers braking.
- Discover the hybrid **electric-over-hydraulic setup** for more control in heavier applications.

👉 Read the [full guide](#) and choose the brake system that fits your trailer and load!
