WHICH IS THE BEST, ROTARY TATTOO MACHINE OR COIL TATTOO MACHINE

Coil vs Rotary Tattoo Machine

As an artist or tattoo enthusiast, it's often confusing which type of tattoo machine one should use. One should go for a coil tattoo machine or a rotary one? Here we'll dig into the details to help you acknowledge both advantages and disadvantages, so stay with us.

Coil Tattoo Machine

Coil Tattoo Machine utilizes an electromagnetic current that controls the armature bar that moves the needles up and down, piercing the skin. Tattoo artists prefer them for drawing intricate lines and shades.

Pros

- Coil Machine is more Robust
- Easy to customize the machine parts
- The heavier weight allows more control
- Faster completion time
- Easy to regulate speed and power

Cons

- Coil machines are not versatile
- We need two coils, one for lining and the other for shading
- Noisy

Rotary Tattoo Machine

A rotary tattoo machine uses an electric motor to drive the needles; this technology changed the trend of tattooing, adding more details and control.

Pros

- Easy to use and setup

Cons

- Coil machines are not versatile

- Lightweight
- Less hand and finger cramping
- Rotary machines are quieter
- Minimal adjustment needed
- Ideal for coloring and filling
- We need two coils, one for lining and the other for shading
- Noisy

Basic Differences

- 1. Lines and Shading**
- 2. Noise factor**
- 3. Weight of the machine**
- 4. Versatility in working**
- 5. The Punch**
- 6. Convenience to handle**
- 7. Adjustments**
