

# What are Twitch Polls and How to Create Twitch Polls?

**Twitch polls** are a feature of the streaming platform to get in touch with live viewers and collect their opinion on a specific topic: what content to stream, what game to play, or a topic to discuss.

They are useful because:

- They help you know firsthand what your community thinks about what you are asking for.
- They allow you to interact with your viewers who can give their opinion and feel that they are part of the streaming.

We present here several characteristics of surveys:

- Polls on [Twitch](https://www.twitch.tv) are only available to streamers who have **Affiliate or Partner status** .
- You can only do **one poll at a time**. When you finish the one you prepared, you can make another one.

- **The streamer is the one who manages polls** , although **editors and moderators** can also create polls during broadcasts.
- In the poll, viewers **vote for an option offered by the streamer**, although it is not mandatory to answer.
- Viewers vote in the poll using **their points from their channel** : they must put at least one point in it.
- Once you have chosen the answer, **you cannot undo the chosen vote and any points you have spent are not refunded.**
- If you feel **the poll is inappropriate or inappropriate** , you can report it and let Twitch know.

Now that you know a little more about Twitch polls, how do you create a live poll?

## Table of Contents

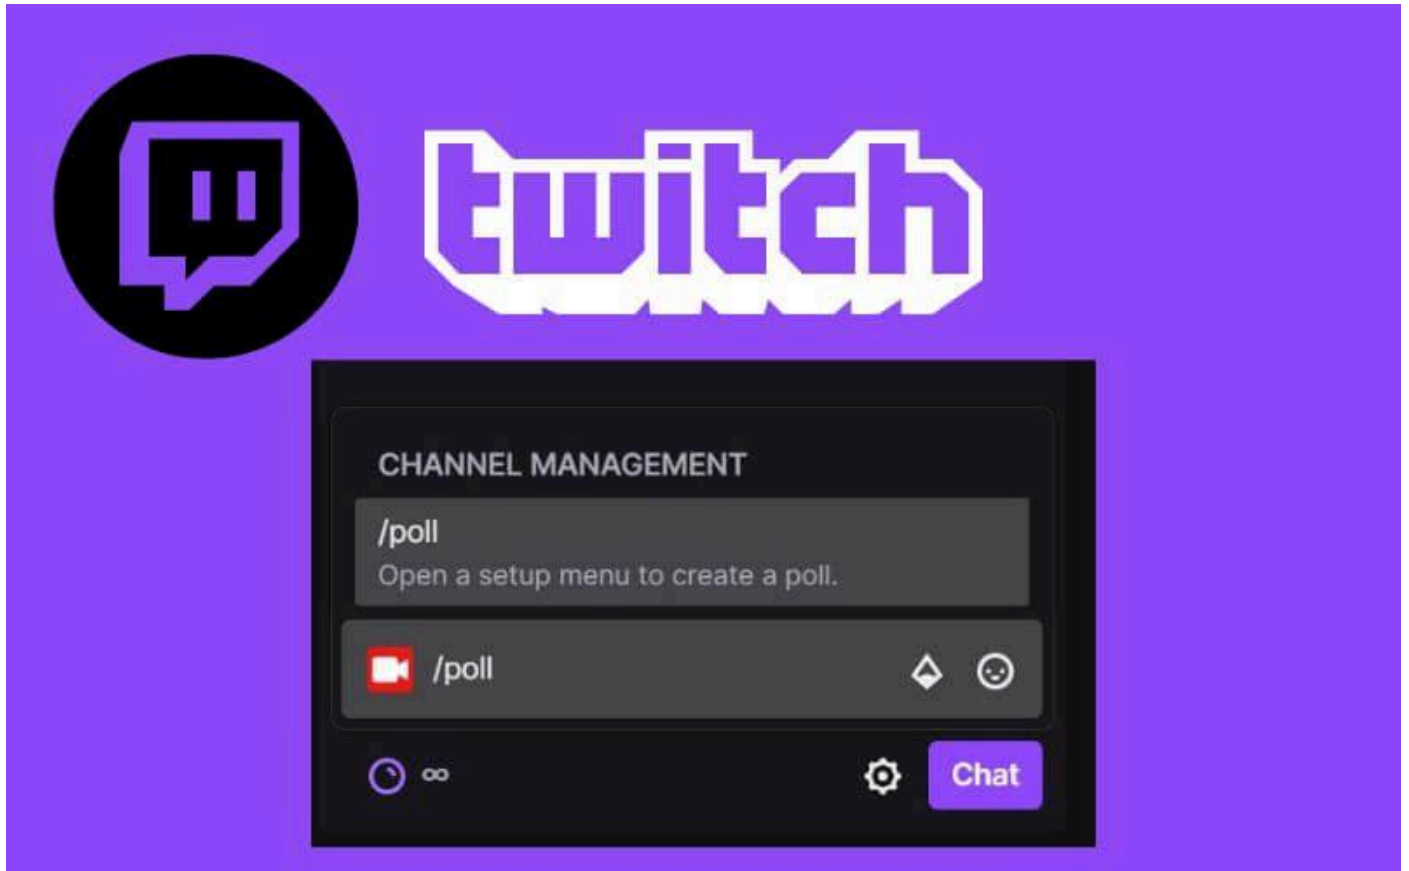

- How to Create Polls on Twitch?
  - [How to Create Polls on Twitch with command](#)
    - 1. Type the command /poll

- How do I vote in a Poll on Twitch?

## How to Create Polls on Twitch?

There are two ways to create a poll: from the stream, through commands, or from the creator panel.

## How to Create Polls on Twitch with command

To create a poll with a command, just go to your chat while streaming.

### 1. Type the command /poll

This is the command you need to type to launch your poll with your viewers. Then click send and press the Enter key.
