

Donation or Child Sponsorship Leads to New Growth for Poor Children to Protect Them

Your small gift will help us create sustainable and ever lasting impact for children, families and the entire communities. SOS Children's Villages India provides support to over 20,000 children living in vulnerable communities in remote areas of India. These children are at the risk of getting abandoned or losing parental care as their families are unable to provide proper food & nutrition due to their financial conditions. With your donation you can help us provide education, food & nutrition to such underprivileged children.
