

Cold Box Inc. - Cold Storage Los Angeles | COLD STORAGE LOS ANGELES

Our 20' long domestic cold storage containers were specifically designed and built for our commercial and special events customers that are looking for dependability and cost efficiency. They can be set to maintain temperatures from -20 to +60 degrees Fahrenheit. These units are equipped with custom-made commercial refrigeration systems that operate on 220 volt SINGLE PHASE power and are very quiet. They have adjustable thermostats so they can be utilized for cool or frozen products.

Manufactured between 2012 and 2017, they are simply “the most energy-efficient portable cold storage modules in the world.” Please call and ask about our NEW 20' High Cube Cold Boxes. so if you need a help with [cold storage Oakland](#) Contact us
