

Amplify your Online Dating App like Tinder with the Salient Features

It is a Dating app that helps find a match having similar preferences. Finding 'the one' is a delightful experience and cannot be put in words. To bring such an experience, we developed a [Mobile dating app like Tinder](#) giving space and flexibility for app users to find the match of their choice. It is made possible with the contribution of technology.

The workflow of connecting your users with their match as follows,

- **Create a Profile**

The app users are allowed to create an account in an app like Tinder instantly by providing their name, dob, gender, active email id, etc.

- **Find your match**

The search feature developed in the clone app eases your search as it helps your users find matches based on the user's search criteria like location, interests, etc.

- **Chat**

The mobile dating app like Tinder helps users connect via the chat module integrated with the clone app.

- **Start Dating**

After finding the partner, users can chat and start dating and get into a relationship.

Unique Features in a Tinder clone app

- **Social Media Integration**

The Tinder clone allows users to sign in with their existing Facebook account that makes the usual registration hassle-free.

- **Creating Group**

This feature in the Tinder clone enables users to create a group that helps them connect with new people, add, and meet them if needed or get matched.

- **Hassle-free chat**

The app is built to permit users to have an unlimited conversation with their mutual matches.

- **Rewind**

This feature enables users to rewind the process if they want to make a change to their last swipe.

Final Words,

The online dating industry is outpacing all other businesses. Understanding the rising online dating trend and the need for a comprehensive platform for the online dating business, our team developed an App like Tinder establishing a business in the market sustainably.
