

Steps Involved In Smash Repairs In Melbourne

If you are like most drivers, at some point, you will have to take your vehicle to a Smash Repairs shop after an accident. In Melbourne, there are several auto body repair shops that offer a complete menu for Auto body repair and restoration services which range from paintless dent removal to Professional detailing.

There are a lot of steps involved in repairing a vehicle and it is also important that you understand the steps, to assure the safety and quality of the vehicle.

VEHICLE ASSESSMENT

Usually, the car is disassembled, so that all the hidden damages can be found. This ensures an accurate quote and time required for the repair. If the car is not disassembled, you may not get an accurate quote.

DAMAGE ANALYSIS

At this stage, the [Smash Repairs Melbourne](#) service provider must answer all the queries and questions regarding the current state of your vehicle and the work that is needed to be carried out for your vehicle. The smash repair Professional will have to give a full repair plan including an accurate quote

BODYWORK

The vehicle is placed on a frame alignment machine if there are any damages to the frame. The machine will then straighten out the frame with the use of torque and hydraulic force to get it back to the original factory specifications. The vehicle becomes safer to drive once the frame is straightened out.

PAINT PREPARATION

The vehicle is primed and is prepared to go to the paint shop, and the technician replaces or repairs the panels as required. The undercoat quality and panel preparation determine the durability and longevity of the paint.

REFINISHING PROCESS

In a special paint booth designed to mimic the factory conditions, the colour coat is applied. Generally, the paint booth is a dust-free humidity and heat-controlled environment which helps to match the newly painted service to the undamaged ones. Special tools are used to polish the final coat so that it matches to Pre-accident condition.

REASSEMBLY

Your car will be reassembled once the painting process is complete. All the details will be added here. And also if there was any glass damage then it will also be repaired or replaced. Then your tyres and wheel alignment are also inspected and adjusted.

DETAILING

For an added shine new paint is polished and then a clear coat is applied, preparing it for delivery and to make sure it runs well and is restored to its pre-accident condition, Your vehicle will be given a road test.

DELIVERY

Special instructions for the care of the newly repaired areas will be given to you and finally, you will receive the documents regarding your repair.
