

The Next Big Moon Token is Here- TrustMoon

To be more honest, the standard banking system is recently the biggest concern over the market each day getting worse. As a result, the global economy is being unstable. Though, luckily, TrustMoon has come up with a complete decentralized banking structure, marking the next step in financial services. TrustMoon is like the other moon projects including SAFEMOON, and ROCKETMOON.

About TrustMoon

TrustMoon is an innovative Decentralized finance platform that provides exclusive banking services and integrates several strategic financial activities with the concepts of blockchain technology and cryptocurrencies.

This platform differentiates financial actions from banks, giving you the credibility to be in charge of your own assets, offering faster payments, and providing cyber protection. The

entire TrustMoon community runs the network, so they believe that every user is equally important. The interface is reliably secure authenticating the user profiles and keeping them safe.

The company announced its newly created [Binance Smart chain network \\$TrustMoon](#), which is the doer in the background. Operating on the BSC fundamentals, the TrustMoon project is built on a Layer 2 network offering an auto-liquidity mechanism.

In the back story, the tokens created on TrustMoon are distributed according to their allocated proportions, where every existing token is added to PancakeSwap and BSC Scan Explorer exclusively. This is for the community members to enjoy the high transparency and indeed this aspect will attract more demand from the market economy.

TrustMoon Tokenomics

TrustMoon has eventually decided to distribute the \$TrustMoon tokens in equal preference sets. The company holds a total supply of 1 Quadrillion tokens in the market cap. The estimated growth target is set to be around a 5000% increase in terms of price after the launch.

Meanwhile, the TrustMoon distribution of its \$TrustMoon token is ready to release soon. The tokens can be distributed by the [\\$TrustMoon Airdrops campaign](#), reward and registration program, mining contest, or simply ICO giveaway. Be alert of the announcement to be out soon.

The token platform has \$8.9B Market Cap value with a presale worth 25% pricing and has an initial burn of about 50% range. They have projected a target to attain around 4 million holders which are perfect according to the planning laid out.

This estimation will raise the demand and tackle a proper circulation supply over price in the overall scenario. Looking at the market fluctuations, surviving has become more difficult than ever. This new moon project will surely stand out from the crowd.

Moreover, the 20% range of the entire supply is allocated to Liquidity on Pancake Swap, wherein, 2.5% is used for marketing purposes. The next 2.5% is stored as a token of team reward.

The company intends to benefit every investor, stakeholder, trader, and fundraiser as well. The input for every trade will perform on the blockchain, where its pool liquidity is integrated into the [TrustMoon Pancake Swap liquidity](#).

What Products can you Find on the TrustMoon?

TrustMoon will soon introduce its on-chain private algorithm. This protocol is intentionally deployed on multi-chain decentralized financial banking applications. Moreover, it will be backed up by a \$TrustMoon token.

The company has set up a pool stake for the TrustMoon holders up to 70% APY, where they can earn high returns on staking and saving the tokens with a pool smart contract. TrustMoon covers the insurance for the users, integrating the coverage with more than 12 crypto-insurance partners. This is a great relief for traders looking for a secure place to join.

To store [\\$TrustMoon tokens](#), TrustMoon offers its self-designed wallet to store, explore and track your coins/tokens. This is indeed a fast and multi-chain crypto wallet deployed on the blockchain with scalable and secure transaction features.

Final Words

The team behind TrustMoon has not yet disclosed their identities and background in public. However, looking at the official platform and perfect integration with market expectations represent their team with high qualifications, experience in the blockchain sector, and expert in decentralized protocol concepts.

The decentralized financial sector is grabbing more and more business clients, mainly through promising enterprises like TrustMoon. One platform needs high dedication, internal explicit knowledge, and an extraordinary way to think out of the box, that's what TrustMoon is capable of. Moreover, from an economic point of view, blockchain technology and modern banking design integration will lead to a much healthier lifestyle.

Well said, don't miss the given chance and join the present movement. Also, if you want to have a potential start, then check out the exclusive [TrustMoon platform](#) and grab \$TrustMoon tokens before anything else. This will definitely bring closer a future without any kind of financial worries.
