

## Various Symptoms and painful problems of Gallbladder

the upper-right section of your abdomen. It helps store bile, with a combination of fluids, fat, and cholesterol. However, bile helps in breaking down fat from food in your intestine and the gall bladder delivers bile into the small intestine. Hence, this allows fat-soluble vitamins and nutrients to be more easily absorbed into the bloodstream. [Gall bladder surgeon in Agra](#) treats the patients with utmost care and provides a assure quality of healthcare services.

### Symptoms of a gall bladder problem-

It shares the similar conditions that includes:

**Pain** – it happens in the mid to upper-right section of your abdomen.

**Vomiting** – This may cause digestive problems, such as acid reflux and gas.

**Fever** – It's a sign of infection that needs to be addressed and treated immediately.

**Chronic Diarrhea** – This symptom is defined as more than four bowel movements per day for at least 3 months.

**Jaundice** – the symptom is marked by yellow-tinted skin and may be a sign of a block or stone in the common bile duct.

**Stool Abnormality** – lighter-colored stools might be a possible sign of a common bile duct block.

**Disordered Urine** – Dark urine is a possible sign of a common bile block.

However, pain is one of the most common sign that there's a problem with your gall bladder. The pain can be mild and intermittent or it could be quite severe and frequent. It can also

begin to radiate to other areas of the body including the back and chest. Dr. Karan R Rawat one of the expertise in medical ethics is known as the best gall bladder surgeon in Agra.
