# PHARMACOVIGILANCE JOB OPPORTUNITIES IN TOP COMPANIES

The pharmaceutical and healthcare sector has grown tremendously in the past few years. Out of which, pharmacovigilance is coming out as a viable option for students to build a stable career. The career growth and opportunities in Pharmacovigilance are immense. Pharmacovigilance aims to gather, understand, assess, and prevent adverse effects of a drug or medicinal product. This is done by various processes such as

1. Individual Case Safety Reports (ICSR).
2. Clinical Review of Safety Reports.
3. Cohort Event Monitoring.
4. Longitudinal Electronic Patient Reports.
5. Periodic Safety Update Reports (PSUR).
6. Spontaneous Recording.
7. Record Linkage.
8. Expedited Report.

A candidate in pharmacovigilance performs the following functions:

1. Reporting adverse events received from customers or healthcare bodies.
2. Reducing the risk of serious side effects.
3. Creating and reviewing serious adverse effects reports.
4. Performing safety audits.
