

Leading the Way in Acne Awareness Month, Kosmoderma Introduces Acne Scar Remodelling

Kosmoderma's team of expert dermatologists utilizes a multimodal approach to effectively treat acne scars, taking into account the grade and severity of each case. The clinic offers an array of [advanced treatment](#) options, including:

[Lasers](#)

CO2 and Erbium laser treatments resurface the skin, stimulate collagen production, and smooth out scars

Microneedling Devices

These tools activate the skin's natural healing process, significantly reducing the appearance of scars

[Chemical Peels](#)

These exfoliate the skin and diminish superficial scars.

Dermal Fillers

These are used to elevate depressed scars, resulting in a more even skin surface.

Surgical Procedures

For severe scarring, techniques such as subcision and punch excision are employed.
