

# Veg Catering Services in Bhubaneswar and Their Pricing Structure

Catering services are far and wide, making it quite confusing when you hire a catering provider for your event or occasion. Nevertheless, knowing some facts about how caterers charge their fees for their services can help you reduce your list, and also help you find the right service provider for your event. There are many occasions when we require veg catering services, such as religious festivals, name-giving ceremonies, etc. If you are looking for [veg catering services in Bhubaneswar](#), you should know how they charge for their services and which services are included in their packages.

## Overall Expenditure on Catering

The expenditure of your catering will rely on many different factors, mainly the size and range of your event, and the added services you opt for. Then again, this type of pricing system has many benefits in terms of expediency, effectiveness, and lucidity.

## Pricing Systems Used by Caterers:

**Tiered** - Tiered pricing is in trend because of its convenience. In this pricing pattern, clients select a pre-set package based on the number of guests. It is somewhat like some pre-defined packages that comprise the kinds of services and a list of food items. For example, for a larger event, you can select a higher tier, which may contain more food and more service. On the contrary, smaller events would require choosing a smaller or first-level tier.

**Fixed** – Several caterers use a fixed price system for their menu. This is a lucid method of rating, providing accurate descriptions and quantities. The prices do not alter along with size, scope, or personal choice.

**Custom** – Caterers also provide custom pricing according to the demand of their clients. The price is negotiated between the client and the company. Here the client can add or subtract any dish from the menu and create their custom menu according to guest number, food preferences, and services required.
