

Countertop for kitchen

Your Countertop for Kitchen with Tropical Green Granite

[KITCHEN](#) | [MATERIALS](#)

What is Work-tops for Kitchen and Why do you require them?

A horizontal, levelled working unit in a kitchen, attached to the wall, unlike a table or freestanding island, is referred to as a kitchen countertop. Your countertop for the kitchen can

be recognized by various names like counter, counter top, top, worktop, kitchen worktop, benchtop, kitchen bench, etc.

Kitchen counter tops make things easier for a cook or any person engaged in a kitchen by providing a hob and prep surface at a convenient level. Besides this primary purpose, a kitchen countertop also provides storage space which can be created with base cabinets under the counter.

There are limitless materials available in the market today to make a good countertop for the kitchen. But, the one in the talk today is gonna be Tropical Green Granite, one of the popular choices among green stone colors.

Cabinet Color Choices for Granite Worktops :

Three main colors of kitchen cabinets that Tropical Green Granite countertop can be paired with beautifully are

- **White:** The white cabinets and green granite countertops balance each other out and enhance the overall look of any kitchen, whether traditional or contemporary. The white of the cabinets will make the kitchen look bright and luminous.
- **Brown:** Brown of the cabinets get along with the green of the Tropical granite countertop for kitchen by neutralizing and keeping it less overwhelming.
- **Wood:** Green granite is naturally suited for wood cabinets due to its earthy golden tones. You should use this design if you want something organic, and nature-inspired. The wooden cabinets make the kitchen feel warm and cozy.

For the cabinet hardware finishes, go with shiny or satin finish or bronze fixtures.
