

The Level Of Development BIM Services Consultancy Silicon Valley

Silicon Valley Infomedia specializes in providing [Level of Development BIM Services](#) tailored to the various stages of construction projects. We excel in creating comprehensive LOD BIM models, leveraging our extensive expertise in BIM technology to ensure compliance with AEC industry standards while customizing these models to meet the specific requirements of each project.

Silicon Valley Infomedia offerings include LOD Architecture Services and a range of [LOD BIM Services](#) such as LOD 300, LOD 400, and LOD 500. LOD 300 is ideal for early design phases, offering detailed specifications regarding dimensions, shapes, and placement. In contrast, LOD 500 delivers extensive data essential for efficient facility management, aiding in maintenance, operations, and future enhancements.

Following are the Level Of Development BIM services:

- BIM LOD 100
- BIM LOD 200
- BIM LOD 300
- BIM LOD 350
- BIM LOD 400
- As-Built BIM LOD 500
