

Artificial intelligence : How can it be a Game changer for Humanity ?

Human intelligence is stimulated in artificial intelligence and the computer is programmed according to the human brain. America is the global leader in artificial intelligence. The reason for this is America's strong innovation ecosystem. Industries, Academic and Government are working together for Artificial Intelligence.

In February 2019, Trump signed the Executive Order on Maintaining American Leadership in Artificial intelligence. Under which he had increased research investment and also focused on Artificial Intelligence work force building and special focus on working with International Alliance as well.

The National Artificial Intelligence Initiative Office was set up in January 2021 by the White House to implement US National Artificial Intelligence Strategy. In which Private Sector, Academic and Other Stakeholders were included. The present Biden administration is also committed to this.

In May 2008, the White House also hosted a discussion on Artificial Intelligence for American Industry. In which there was a discussion about Artificial Intelligence Technologies. Washington

has announced to spend six billion dollars on artificial intelligence related research in 2021.

Some jobs will be lost due to artificial intelligence and some new jobs will also come. The American people should be prepared for this. Like the receptionist job is already gone. In the time of corona, people have taken online appointment only.
