

# Canada Invests \$3.2 Million into Silicon Photonics Company

On Nov 30, 2021, the government of Canada dropped a CA\$3.2 million investment into Montreal-based One Silicon Chip Photonics (OSCP) through Sustainable Development Technology Canada (SDTC), a government-backed initiative to drive cleantech innovations in the country. OSCP is a growing Canadian cleantech company pioneering optical sensor technology, building inertial navigation sensors for autonomous vehicles.
