

Top reasons why USA tile distributors should add Indian tiles to their portfolio

Tiles are thin, rectangular, or square-shaped coverings. These are manufactured from stone, ceramic, glass, or baked clay. Tiles are fixed to cover floors, roofs, edges, walls, and other objects.

Several kinds of tiles are manufactured all around the world. In North America, the market for ceramic tiles in 2021 was approximately USD 21.50 billion. While India's demand for tiles in the year 2019 was at \$3,720.2 million, it is expected to reach \$7,144.7 million by the year 2027.

The USA - India relations are much better, and that too in terms of business. The tile distributors can opt for Indian tiles by adding them to their portfolio. You might be wondering why USA tile distributors should do this. In this blog, you will be able to note different reasons that can influence USA tile distributors.

Good quality tiles

What a customer looks for? Quality, right? Indian tiles distributors focus a lot on the quality of tiles while manufacturing them.

Here, you can find several quality officers assigned on duty to check the quality of tiles before they dispatch.

So, if you are a tile distributor in the USA, then you should prefer adding Indian tiles to your portfolio. This will result in having excellent quality tiles at your place, which is worth their price.

Designer looks

Indian [tile manufacturers](#) have always put extra effort into making a tile look the best. In India, you can find a wide range of designs in tiles. Here you can find the most aesthetic-looking tiles, classic ones, and those in trend in the USA.
