

At ALUMIL we build excellence every day

Through our modern production facilities and strict quality controls along the entire production line, we ensure the creation of superior products of high added value. Our continuous research and Development leads to offering unique solutions with many innovative features, which totally meet the needs of our customers.

[Alumil Systems India](#) operation started in 2015 as a wholly-owned subsidiary of Alumil S.A. and is headquartered in Navi Mumbai with an established infrastructure.

Alumil Systems India has emerged as a brand leader in India's Aluminium Industry. With more than 5 years of experience, 100+ executed projects and 30+ employees, we are one of the most advanced company in the design and production of architectural aluminium systems.

[Alumil Systems India](#) has expanded its area of operation across the country through our "Alumil Display Showroom". We Provide training to our business partners and a warehouse to support the local market in India.

Through strong supply-chain management processes, central and regional warehouse, logistics and after-sales support system, we are committed to provide trendsetting services and leave an everlasting imprint in the world of aluminium services!

Windows-Doors

ALUMIL has the ideal [window & door systems](#) for your home. Our wide product range, with multiple hinged, sliding, or bi-folding window & door solutions, incorporates all the expertise of our innovative Research & Development department and is characterised by top aesthetics and excellent functionality. Aiming always for top quality, ALUMIL's energy efficient aluminium windows and doors are the first choice for new constructions and renovation projects in which compromise is not an option.

Curtain Walls

[Curtain and window wall systems](#) are used as building envelopes and assure maximum daylight intake within the interior space, creating a safe and comfortable environment for the building's occupants. Moreover, aluminium curtain walls are a popular choice because of their

high aesthetic value and their limitless possibilities in architectural applications. Curtain walls are separated into three (3) main categories: Stick type (standard), structural and unitized curtain walls.

Entrance doors

The most attractive residences have one thing in common: impressive entrance doors.

[Entrance doors](#) lead residents and their guests into the house, while simultaneously protecting against unwanted “visitors” like the cold, noise and of course... burglars! [Alumil Systems India](#) entrance doors combine multiple design options along with high security level, high thermal insulation and exceptional durability. Our company offers many infill options including aluminium or glass panels and is able to meet the most demanding architectural trends and aesthetics.

Shading systems

[ALUMIL's shading systems](#) can be used in residential living spaces as well as in hotel or commercial facilities, enabling perfect integration in any architectural setting. Our range of solar shading systems offers not only better living conditions, but also energy savings, especially during summer, thanks to the reduction of energy needed for air conditioning.

Railings and Fences

We offer a great variety of [fencing and railing systems](#) which are characterised by minimal design, extreme robustness and enhanced levels of safety. Ideal for residential and commercial use, they surround various spaces and balconies by providing safety & comfortable privacy, whilst upgrading the building's aesthetics without the need of any maintenance costs.

Wall Cladding Systems

Besides curtain walls, [Alumil Systems India](#) offers special cladding systems for covering the exterior walls of buildings with elements that are characterised by top performance and aesthetics. We offer numerous decorative options and all the necessary supportive frames so as to achieve excellent and long lasting results.

Building materials

Apart from [aluminium systems in India](#), we offer an exceptional range of building materials and particularly various polycarbonate sheets and wood-plastic composites (WPCs). Having always in mind to provide our clients with complete solutions, these products are characterised by their premium quality and are suitable for vast applications, such as atriums, skylights, decking, fencing, cladding and many more.

Partitions

[Alumil Systems India](#) offers outstanding interior partitioning systems with minimal lines, which are ideal for business and office premises, as well as meeting rooms and banqueting. They have been designed for elegant space separation and sound reduction, offering various typologies and construction options, with standard or structural panels.
