

Suddenlink Email Settings for Email Account Configuration

Not only does a Suddenlink email allow you to control the services you have selected for Suddenlink Communications, but also to send and receive emails using it as a standard email address. What's unique about this email service is that you can even set it up on third party email programmes such as Microsoft Outlook and Mac Mail, apart from accessing it via the web portal. You will, however, need to know the [Suddenlink Email Settings](#) for email account setup in order to access your Suddenlink email account on an email programme. This guide includes information on the [Suddenlink Email Server Settings](#), as well as the Outlook and Mac Mail programme setup processes.

Suddenlink.net Email Settings

You will need the following **Suddenlink email settings** before you follow the configuration procedure.
