[BIM Level of Development](#) is a one types of process that includes the accuracy, and completeness of Building Information Model elements. It is a measure used to represent the completeness of a BIM project at various stages of design and construction. The LOD is a 5-level scale based on the amount of information associated with each building element. Level 0 is basic geometry, Level 1 is basic geometry with some associated parameters, Level 2 is a fully detailed design model, Level 3 is a fully detailed and collaborative model, and Level 4 is an as-built model....!
