Direct blood pressure, an invasive [Hypercaps Cijena](#) surgery, is the gold normal to match the accuracy of non-invasive blood pressure (NIBP) technologies. Direct blood pressure should be obtained on the rodent's carotid artery [Hypercaps](#) when comparing to NIBP. "Validation in Awake Rats of a Tail Cuff Technique for Measuring Systolic Pressure", Bunag, R.D., Journal of Applied Physiology, Vol thirty four, Pgs 279-282, 1973. **Click here to buy:**
