Buildinginformation MODELLING

LOD 300 BIM Design Services

LOD 100
Provides basic conceptual design and visual representation of the building model.

LOD 200
Includes more detailed information such as approximate sizes and shapes of building components.

LOD 300
Contains accurate geometrical and dimensional data for building elements, enabling coordination between different trades.

LOD 400
Provides detailed information about individual components, such as fabrication, assembly, and installation details.

LOD 500
Contains information about the building's performance and operations, including maintenance, repair, and replacement schedules.
