

Discover the Unbreakable AI Smartphone That Can Survive Almost Anything

HONOR just announced the upcoming launch of The [HONOR X9c Unbreakable AI Smartphone](#), Building impressively from the success of the HONOR X9a and HONOR X9b, this series continues to impress South Africans with its durable features — now more than ever before. The call for a phone that can withstand wear and tear, as well as resist water, drops and heat has been answered by the HONOR X9c Unbreakable AI Smartphone. It delivers innovation and affordability that is tailor-made for South Africans.

HONOR X9c 5G

**Up to 2m
Drop-resistant**
On Rough Surfaces

*The data comes from the HONOR lab. As a precision electronic product, there is still a risk of damage when the phone is dropped. Please be careful to avoid falls or collisions. The phone has been tested under controlled laboratory conditions, and neither the IP rating nor the MIL-STD-883C standard is intended to be used to determine any conditions. It passed the 2-metre dropping test. Impact, water, and dust resistance are not permanently effective, and the product's performance may decrease due to falls, wear and tear. The test attempt for design and structure. Legal change with customer under warranty.

New Generation of HONOR Drop-Resistant Design

Featuring the latest HONOR Drop-Resistant Design, it can resist **drops from up to 2 meters**, keeping the phone safe during accidental falls. The **scratch-resistant glass** and back shield provide strong protection all around. Plus, the **special curve design offers 3D protection** for the corners, guarding against impacts from any angle. [Scratch resistance](#), which easily handles everyday items such as keys and coins adds to the value.

Ultimately, it's made to take on the hard surfaces we face every day to avoid those oops and eish moments.

HONOR X9c 5G

**-30°C to 55°C
Durability**
Withstands Extreme Weather

*Data from HONOR lab. Under the ambient temperature of 25°C, HONOR X9c can stand normally and supports the use of full contact, and text messaging functions. The actual performance may vary depending on factors such as device aging, network environment, user habits and differences in the product's temperature zone. Please refer to the actual experience.

Designed for Extreme Temperatures

As diverse as its people, South Africa's climate is extreme — from icy-cold nights in the mountains of the Northern Cape to baking-hot 40°C days in the Kruger National Park. To maximise safety the battery features an Armor-level Protective Coating and [multi-point temperature monitoring](#), that intelligently adjusts the charging strategy based on temperature variations. With an operating range of -30°C to 55°C, the battery impresses with the ability to stream videos for hours or **up to 30 hours of audio calls at 55°C**.

HONOR X9c 5G

360° Water-resistant

At a Depth of 25cm

*This is not a waterproof mobile phone. It is splash resistant and water resistance is not guaranteed. Splash and water resistance are not permanent and protection may be reduced by dirt, wear and tear. Do not charge the phone when it is wet. See the user guide for cleaning and drying instructions. Damage due to immersion is limited to the product under warranty. **Data from HONOR lab, HONOR X9c has been rigorously tested to full functionality after being submerged in water for up to 5 minutes at a depth of 25cm.

Water-Resistance for a Splash-Ready Experience

In a country surrounded by an immense stretch of coastline and filled with vast rivers and dams, water resistance is yet another welcome level of protection. The HONOR X9c Unbreakable AI Smartphone has a special **three-layer waterproof design** that protects it from water all around. The first layer has a [waterproof ring](#) on the outside, the second layer seals off the sensitive parts inside and the third layer covers the main components tightly. With an **IP65M rating** for water and dust resistance, the HONOR X9c Unbreakable AI Smartphone has been tested to work even after being in **25 cm of water for up to 5 minutes**, so you don't have to worry about accidental drops in water. Whether you're working through lunch or enjoying a sho't left, the device is also protected from wet or greasy hands.

This means that whether you're at the colder beaches of the Cape, warmer tropical coastline on the East or hiking the breathtaking landscapes inland, its advanced features ensure you stay connected despite the bumps, spills and general wear and tear. Verified by the **SGS Five-**

Star comprehensive reliability certification, the HONOR X9c Unbreakable AI Smartphone is made to last.

This [hard-to-ignore AI smartphone](#) is also stylishly packaged in Titanium Black and Jade Cyan.

From surviving to thriving this is a device truly inspired by the resilient spirit of South Africa.
End.

About HONOR

HONOR is a leading global provider of smart devices. It is dedicated to becoming a global iconic technology brand and creating a new intelligent world for everyone through its powerful products and services. With an unwavering focus on R&D, it is committed to developing technology that empowers people around the globe to go beyond, giving them the freedom to achieve and do more. Offering a range of high-quality smartphones, tablets, laptops and wearables to suit every budget, HONOR's portfolio of innovative, premium and reliable products enables people to become a better version of themselves.
