

AngularJS is a very powerful open-source web application JavaScript framework used in Single Page Application (SPA) projects. It is completely free, and used by thousands of developers around the world and extends HTML DOM with additional attributes and makes it more responsive to user actions. An efficient framework that can create Rich Internet Applications. It provides developers with an option to write client-side applications using JavaScript in a clean Model View Controller (MVC) way. [AngularJS Development](#) enables businesses to secure ready-made solutions, efficient and highly scalable. AngularJS is a front-end development platform using which developers create interactive user experiences.
