And so, without further ado, let's start with today's video. While your credit card score is very important in getting approved for loans and getting the best interest rates, so you do not need to obsess over the scoring guidelines to have the kind of score that your lenders want to see. And in general, if you manage your credit responsibly, and as a result, your score will shine. And as you can see, the most prominent hits to your credit score come from the measures you have to take to look for yourself out of major debt. However, even if those corrections are designed to get you back on track. And if you can avoid the big issues at the top of this list and always keep your eye on the much more manageable bottom half, you can keep on focusing on building your credit. And always remember, good credit is where the opportunities begin. Well, guys, that is all we have for you today! What are your thoughts on this? Which one do you think is the most helpful?
