1. What is Mesotherapy for hair?

Mesotherapy is an upcoming non-surgical process that can be used to treat hair and scalp conditions. The procedure involves using boosters to inject vitamins, plant extracts, and other blends to the hair follicles. The beneficial impact of mesotherapy can be manifested in the form of correction in hormonal imbalance, delivery of nutrients and improvement in blood circulation. Today, mesotherapy is being widely used as a clinical rejuvenation process to [treat baldness](#), hair loss and improve the growth of hair.

1. How does mesotherapy work for hair loss?

To administer the treatment, an experienced professional inserts a collection of injections into the middle layer of the skin. These will deliver a collection of amino acids, vitamins and plant nutrients to the epidermal layer. The treatment aims at stimulating the mesoderm layer of.....
