

Innovations During Tough Times

They say, "Necessity is the mother of inventions". It proves, that innovations happen during the tougher times. Many industries, like Manufacturing, IT, Automobile, and Retail are experiencing a major shift and coming up with newer innovative ideas to help their businesses grow. Education is the pillar of development for any nation, outspread of the COVID-19 pandemic has seen a big disruption in the education sector. Educators around the world have quickly adapted and switched teaching from physical to virtual classrooms. The innovative approach to teaching is becoming popular. Interestingly newer & lesser-known technologies like Artificial Intelligence (A.I.) is been used and exploited to make learning easier & effective. A primary school teacher from a village near Solapur in India animated books with QR codes and further went on to win a prestigious Global Teacher award in 2020. Innovation demands no barrier and where there is a will there is a way.

During the entire pandemic period, we at Delphi always believed that learning should not stop at any cost. With the help of technology and advanced tools, our team worked with our principal partner SAP, and others stakeholders to draft strategies to make learning more interactive to keep students involved. We are glad that we not only provided [SAP training](#) virtually but also successfully delivered our patented in-house program CCP (Complete Consultant) including internship & other training. Through our weekly webinars & Q/A sessions, we were able to reach thousands of SAP aspirants across the globe to facilitate their transition to SAP consulting.
