# MAG524w3: Description, function, features and specification

It is a reliable STB which is a version of Linux OS and the superb micro design is so desirable that it easily fits into any interior without taking any help from an architect. **Mag542w3** set-top box is so designed that it ensures high performance and requires any sort of rebooting that also for several months. This wow feature is because the device is driven by an Amlogic chipset making it a reliable choice for many and is also more powerful than most of its legacy models. Hence a top choice among buyers.

The UI and the content playback of the device are also commendable. Moreover, the media player supports a plethora of video formats including 4k content that is also at 60fps. The HEPC codec ensures that there is always a seamless preparation so that you can easily stream HD content even if you own low internet bandwidth.

**Ethernet**

This set-top box comes with an Ethernet port with a dual-band wifi module that also with a wifi connection so it offers up to 100Mbps in 2.4 GHz mode. Moreover, users can easily choose their convenient connection type

**Wireless (Wi-Fi):** This allows users to place their STB at their workstation, in the living room or any of their favourite places without fretting about the location of the wires.

**Wired:** Provide a stable internet connection despite low bandwidth.

**Peripherals**

Most external hard drives, Pen drives, keyboards, wired mouse and even headphones can be easily connected to the mag542w3 Set Top Box as it has USB 3.0 and 2.0 ports.

**Sound**

The media player of the mag542w3 STB easily supports Dolby digital plus for an out-of-the-box experience with an intense stereo effect that makes you feel that you are in the scene rather than experiencing plain music.

**What is included in the package?**

- 1 MAG524w3 STB
- A user manual
- An HDMI cable
- A power adapter of 5 V & 1 A
- A good and branded remote control
