

Language Development In Children And How You Can Support It

Speech, language and communication play a critical role when it comes to development of preschoolers. From helping the child understand what is going on around them, to communicating their basic needs and feelings, developing relationships, solving problems, and more, there is a lot that language development in children can help with. Since the beginning of the pandemic, however, with access to play schools being restricted, language development has regressed for a sizeable number of children. [Read Here](#)
