

Pressure Sensitive Labels Market Forecast to 2029-Covid-19 Impact & Global Analysis–by Application

INTROSPECTIVE MARKET RESEARCH Global Pressure Sensitive Labels Market was valued at USD 88.13 Billion in 2021 and is expected to reach USD 118.34 Billion by the year 2028, at a CAGR of 4.3%.

Pressure sensitive labels are similar to high-tech stickers in appearance. They can employ a variety of inks and can use paper, film, and foil as their major label materials. Because they don't require heat, solvent, or water to activate, applying (or sticking) them to a product surface requires just light to moderate pressure. They're sold in rolls that may be peeled off and put onto a product by hand or machine. Food and beverage, healthcare, automotive, construction, electronic products, general manufacturing, and logistics are just a few of the industries that employ pressure-sensitive labels. The surge in the packaging business, mainly to increased demand from e-commerce items and food packaging, is the primary driver of market expansion.
