

Best Crypto Staking to Start In 2023- DecenPool Staking is Live

Start Staking on the DecenPool EVM Now

The team recently announce that the new EVM-based staking program is now live on the official platform. The new commencement adds a crucial missing piece of the puzzle presenting a greater initiative to reinforce overall decentralized AUM ecosystem.

DecenPool Finance is a new project that works on a decentralised yield mechanism for users to earn passive income. It is incorporated using distributed professional traders panel to feasibly generate stable trading returns with diverse options available.

The project backs up other applications like 'Decen Terminal' recently developed and released as a developer's hub to design numerous effective blockchain products. DecenPool ecosystem is looking to boost the EVM-based network and seamlessly attract new developers/users to this emerging marketplace.

As a user, you can exclusively enjoy staking rewards as an additional benefit on DecenPool by staking your assets on this profitable chain and industrial marketplace. Note that along with voting privileges and right to participate in project governance decisions, you will receive an APY of 200% by 2023 which is now possible by inflows from the DECEN token reserves proving no inflationary impact.

You have an opportunity to join back-to-back releases as a two-way street for user as well as organization and enjoy profits together. This platform is now issuing to create a balance of incentive and reward structure for users and developers alike interacting with the blockchain network, wallet, tokens and overall ecosystem.

Importance of Staking in DecenPool Finance

The concept of staking has rapidly emerged amongst one of the best decentralized investment opportunities. Since 2021, this sector and strategy has caught the attention of several blockchain networks that are yet not ready to offer this feature at its best. You will find numerous staking models, services, and custody levels live and working on variety of networks presenting diverse range of aspects.

Henceforth, unlike conventional staking models that makes you lock assets for typically an extended periods reasonably up to 30 days. DecenPool staking program enables you to use the issued receipt of tokens to raise your yield further simultaneously earning attractive staking rewards.

Following the strategy, this staking panel serves as the foundation for several operations like liquidity pools, lending, and yield farming for overall DecenPool ecosystem. Also, you can connect to diverse decentralized applications in order to achieve major incentives while benefiting from lucrative staking rewards.

Say Hello to DECEN Tokens

As a BUSD staking solution, DecenPool offers several benefits than other staking protocols starting with \$100 to \$100,000 BUSD where you can earn 0.80 % on daily basis for 250 working days. For beginners, you can boost your earnings with 50 level referral earning and other royalty bonus.

DECEN tokens now appeal users offering quicker access with easy deposit and withdrawal options to access your funds. Additionally, this platform presents a level of trust and transparency quite significant feature for people using this portal as an integral part of investment. DECEN token is a BEP20-based asset and a smart contract system primarily developed on the Binance blockchain.

Following the standard protocols, DecenPool DECEN tokens are feasibly transferable between users and other platforms using BEP20 compatible wallets system and can be seamlessly integrated into exchanges. The team designed the assets with a maximum of 10,000,000 DECEN tokens to generate high-yield profits.

In fact, the distribution of DECEN tokens is carefully issues where 25% of total supply will be used to conduct a Pre ICO, 20% for liquidity purposes, next 2% DECEN tokens will be shared between the founders of the DecenPool and further locked in a smart contract for around 3 months. Additionally, 50% of the total supply is kept aside for development and staking program, while remaining tokens will be raised for other purposes like advisory, bounty, and PR pools.
