

# Effortlessly Manage Your Blinds | Blinds Magic

No matter where you are, you can always be in control of your home with your smartphone. With the convenient app, voice control, and remote, you can easily control the amount of light that enters your room, creating a comfortable environment that suits your needs. For more information [visit our website](#).

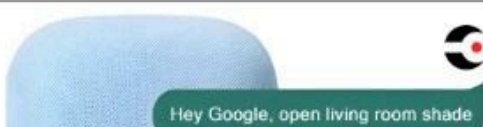

# Effortlessly Manage Your Blinds

With the convenient app, voice control, and remote, you can easily control the amount of light that enters your room, creating a comfortable environment that suits your needs.

## Smart Home System

BlindsMagic motorized shades are designed to integrate seamlessly with your existing smart home system. This means you can use voice assistants like HomeKit, Amazon Alexa, or Google Assistant to control your shades using simple voice commands.

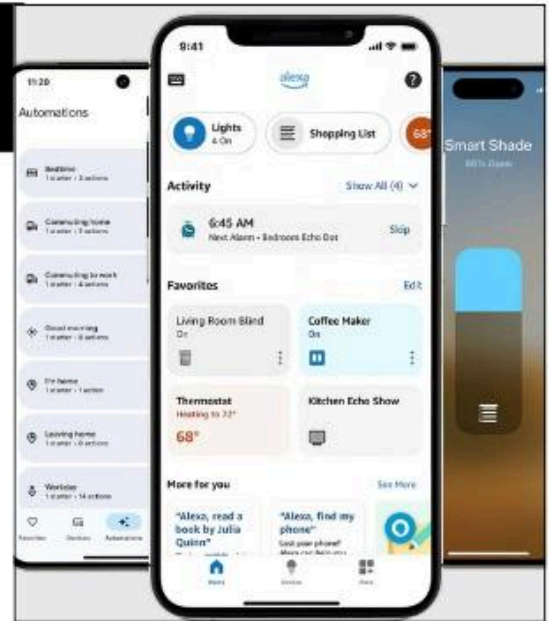

Control With Your Voice

By using voice commands, you can easily open or close your shades without having to leave your seat or even pick up your smartphone. For example, you can say "Hey Siri, close the living room shades" or "Hey Google, open the bedroom shades".

## More Convenient & Comfortable

With motorized shades that are integrated with voice assistants, you can also set up custom voice commands and scenes. For example, you can create a scene called "Movie Night" that automatically lowers the shades and dims the lights when you say "Hey Siri, activate Movie Night".
