

Buy Ivermectin Online- Live Search Today

Ivermectin is a prescription anti-parasitic drug that helps treat parasitic infections of a person's skin, eyes, and intestinal tract. This medicine [comes in the oral tablet](#), topical lotion, and topical cream form, and your doctor will recommend the one best for your condition.

This drug is readily available, and you can [Buy Ivermectin Online](#) or offline at your nearest drugstore with a doctor's prescription. However, you can get better deals and offers if you choose to purchase this drug online.

Ivermectin is also available under the brand name Stromectol (oral tablet), but people usually prefer to purchase the generic version because it is typically cheaper than the brand name counterpart. Both generic and [brand name variants](#) of this drug work similarly. When you take the oral tablet, it gets the job done by binding to the parasite's insides, eventually paralyzing and killing off the parasite. It also attacks the adult parasite and hinders its larvae making while keeping the infection under control. This [medicine might not](#) start working immediately after consumption, and it might also not work if you take one dose and stop using it. Try to consume the drug as prescribed by your doctor for the best results.

You can easily [buy medicines online in the USA](#), including Ivermectin. However, when using this drug, make sure to follow your doctor's instructions as consuming this drug not per specification might result in severe adverse effects.

The proper drug amount can [vary from person](#) to person, depending on the following factors:

- patient's age
- the condition to treat
- the severity of the condition
- [other medical issues](#) the person might have
- how they react to the initial dose

The parasite infection in the intestinal tract adult dose is as per the following:

- 200 mcg/kg of body weight
- [take it is one dose](#)
- typically, a person does not need more than one dose

Adult dosage for eyes or skin parasite infection:

- 150 mcg/kg of body weight
- patients need follow-up care from a doctor
- they will [also require additional](#) treatment with this medicine
- the doctor will decide when the patient will receive the next dose
