There are multiple ways to use Schwarzkopf IGORA Vibrance:

- **Dual System Application**
- **Full Head Application**
- **Glossing**
- **Pastel Toning**

DUAL SYSTEM APPLICATION

It is a professional application method that combines permanent hair color for the re-growth area with demi-permanent hair color for the mid-lengths and ends. This system keeps hair lengths and ends in optimal condition for a more vibrant shine and a gentle touch.

- It uses a 1:1 mixing ratio with [Schwarzkopf Igora Vibrance Activator Lotion](#) or [Schwarzkopf IGORA Vibrance Activator Gel](#). This method allows for root coverage while maintaining the health and vibrance of hair ends.
- On dry hair, apply [Igora Royal](#) to root regrowth and allow it to develop for 10-20 minutes.
- Apply Igora Vibrance to mid-lengths and ends and develop for further 10-20 minutes.
- Rinse, wash, and style.

FULL HEAD APPLICATION

- Start the application on dry or towel-dried hair
- Part the hair into 4 quadrants
- Apply evenly from re-growth to mid-lengths and ends
- Development time: 10 – 20 min.

GLOSSING, CLEAR GLOSS, PASTEL TONING & NEUTRALISATION

- New Igora Vibrance comes with 8 new toners and a new clear 0-00
- Use to neutralize after lightening services or to create beautiful pastel tones

PASTEL TONING:

- Pre-Lighten hair to level 9 or lighter
- Apply IGORA VIBRANCE Toner evenly to towel-dried hair
- Development time: develop visually for 5-20 min.

PLACEMENT OR FREEHAND APPLICATION

- Start the application on dry hair.
- Isolate selected strands in foils or work with a freehand technique to create multi-dimensional results

Development time: 10 – 20 min.
