One day, metals have gained a will and randomly began to attack humanity all over the world———

Without knowing the cause, all the civilization and history on the earth were destroyed, and mankind has been hit by unprecedented catastrophes for about 1,000 years.

Humans drastically reduced their numbers and managed to survive while resisting the attack against the metal with will Tekki.

Many of the remaining humans have awakened to their supernatural powers, and devoted themselves to the days of battle. Meanwhile, a girl named Natsuhime, one of the warriors belonging to the frontier country of Kanto, defeats Kurokami, the greatest threat of Tetsuoni.

The people of Kanto who survived are shaken and rejoices the disappearance of a thousand-year-old threat to human existence.

This story revolves around the boy Shin, who has no memory of being found in the remains of Kurokami after the battle. It is a story of mankind's revival and how it reconstructs history from the former civilization that humans lost to Kurokami.
[**Introduction translated from DMM official summary**]

*Update Ver. (17.12.2023)

{*Change Logs*}

- Adds falling sakura petal effects in certain scenes.

- Fixes CG unlocking: All CGs should now be unlockable and the CG gallery should now scroll correctly.

- Adds character animations and reactions that occur in mid-line.

- Modifies and improves the behavior of several effects and transitions.

- Adds fancy images to the UI buttons at the top of the screen.

- Adds per-character Voice Volume and Mute configuration, accessible via the Settings menu.

- The second halves of long lines should no longer cause the textbox opacity to change in Fixed UI mode.

- Fixes a number of typos and text issues.

• Something to note, loading a save returns an

error when moving the vn to another location or

changing folder name can be bypass

• One more thing, if you rename

the folder or move the vn folder to another

location all the saves will not work
