

Expert-Led LEW Course in Singapore – Boost Your Licensing Success

Looking to become a Licensed Electrical Worker (LEW) in Singapore? RES Engineering Services offers a comprehensive **LEW course** designed to prepare candidates for EMA's LEW licensing examinations. Backed by over 16 years of industry experience, our director and trainers deliver expert-led instruction tailored to equip you with the technical knowledge and practical skills needed to succeed. The [LEW course](#) covers essential topics such as electrical safety, system studies, site testing, and maintenance strategies, ensuring a well-rounded preparation. We also provide consultancy and application support for EMA licences (400V & 22kV), supply installation approvals, and LEW project services. Whether you're a new candidate or looking to renew your licence, RES Engineering's LEW preparation course gives you a competitive edge in the field. Join our proven programme and take a confident step toward LEW certification success in Singapore.
