

## Glory to God. Clear signs and miracles to the whole world from God on Pluto for Sunni Islam

### First

When we look carefully at this photo of Pluto, we will notice the following Arabic sentence

الله ♥ محمدا

which means

Allah loves Mohammad

God loves Mohammad

And, since the heart is so big, that means (so much love) or: God loves Mohammad so much

These terrains were made by God almighty on the surface of Pluto

If you didn't notice the Arabic words yet, look inside the red circle & the red rectangle on the following photo where you can see the Arabic word

الله

which means

Allah

God

inside the the red circle

And you can see the Arabic word

محمدا

which means

Mohammad

inside the the red rectangle

God could make the terrains clearer words but maybe He didn't want NASA to notice the words before it publishes the photos officially world wide

## **Second**

Also the Arabic word

الله

appears on another place of Pluto as you can see on this photo of Pluto

inside the red rectangle here

### Third

When we also take a look at one of the moons of Pluto we find it looks like the Arabic word  
الله  
which means  
for Allah

But I would ask NASA: Why isn't the photo clear?!

#### **Fourth**

And when we take a look at the following photo of Charon, the largest moon of Pluto, we notice the Arabic word

محمد

which means  
Mohammad

So, I would suggest to NASA to change the name of this Charon to: The Moon of Mohammad. Seriously

**NEW**

added on 1 October 2015

Since Jesus wasn't crucified or even killed (The Holy Quran 4:157-158), and since many people around the world for centuries consider the crescent as a symbol for Sunni Islam for many reasons such as that the holy month of Ramadan starts when a pious Sunni Muslim sees its first crescent every year, maybe God made the following terrains on another side of Pluto. At the following photo of Pluto you can see the crescent getting over the cross while the cross is falling to the bottom through a hole

Notice that the crescent in this photo stands on a pole like the ones on the mosques of Sunni Muslims such as the one in the next photo

The sources of these great photos of Pluto & its moons are the following 2 links from the official website of NASA

[https://www.nasa.gov/mission\\_pages/newhorizons/images/index.html](https://www.nasa.gov/mission_pages/newhorizons/images/index.html)
