Description:

Pickering Tree Service is a locally operated tree care company primarily serving the residents and business of the beautiful city of Pickering and the surrounding cities in the Durham Region. We are tree experts and our first priority is always to see if we can save and recover the tree on your property. With a little TLC and a lot of technical expertise we are confident that diseased or dying trees can be saved. If tree removal is our last resort, we have the trained technical staff and state of the art tree removal technology to tackle any tree project. After safely removing the tree we will chop the tree into manageable pieces and haul it away for you. Our services do not stop there, after the removal of the tree we also tackle tree stump removal jobs. An unattended tree stump continues to experience root growth which can damage your property. It also has the potential of damaging your landscaping equipment and other mature trees near the tree stump. A rotting tree stump eventually is the perfect home for insects that can ultimately infest your home. We recommend to our clients to have the stump removed. To ensure your existing trees continue to flourish our services extend to tree maintenance plans that are tailored to our customers needs. From tree mulching, bracing and fertilization we can ensure your investment continues to grow and mature and provide all the benefits of large trees on your property. We offer both residential tree maintenance plans and commercial tree maintenance plans. Finally, the not so fun side of our business is to attend to your property to remove a fallen tree or snapped branch that has caused damage to your property. Our weather can be unpredictable with summer thunderstorms and winter snow storms. Mother nature can play havoc on your landscape; however, we are available 24/7 to

look after all your emergency tree removal needs. For upfront transparent tree service pricing, quality customer service look no further than Pickering Tree Service. We are happy to provide you with a no obligation tree quote.
